8 First Use

8.1 Installing the SIM Card

- S50 is 3G tracker. Make sure the SIM card is compatible with 3G.
- SIM card is Micro type, 15*12mm.
- Ensure the SIM card has enough balance.
- SIM card should have GPRS data plan for platform tracking.
- Ensure PIN code has been closed.
- Authorization SOS numbers can't work well if SIM card doesn't have caller ID service. E.g.: device can't reply SMS to authorization SOS number because SIM card can't identify incoming call.
- Turn off device before SIM card installation.

Unscrew and open the rear cover case

8.2 GPS Antenna

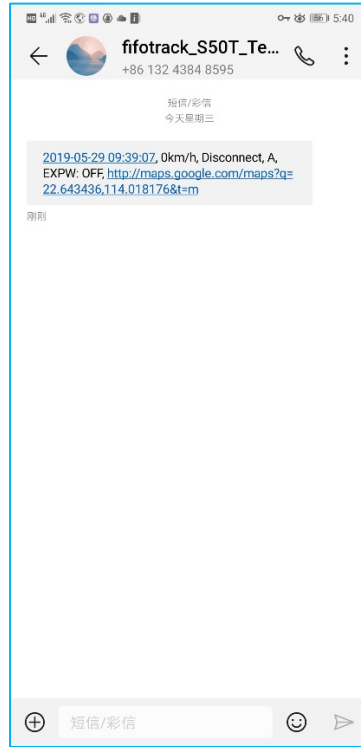

Top side of S50 should face Sky for better GPS signal.

 Don't install the Device where is shielded by metal. For example, inside a metal can.

8.3 Tracking by Calling

Call the SIM card number inside S50, you will get a SMS reply with Google map link. Click it for specific map location.
